Solid Blank Panel with Hinge for Server Racks - 4U

StarTech ID: RKPNLHS4U

You can improve the appearance and airflow of any standard 19-inch server rack while maintaining easy access to server equipment, using this hinged 4U blanking panel.

Professional look

The blanking panel creates a clean and professional look by covering empty space and visible cables. Adding blanking panels to your server racks offers a tidier appearance for a more organized server room.

Hassle-free access

This solid rack-panel features a hinged design that enables you to open it for fast and easy access to your rack-mounted devices. You can quickly open the panel, make your required adjustments and when you're finished, simply close the panel to restore the professional appearance and order of your server room. The panel is reversible, which enables you to install it on the left or the right side of your rack, to best suit your needs. This rack panel also comes complete with rack installation screws and nuts, giving you everything you need to ensure a hassle-free installation.

Improve airflow

The blanking panel offers a solid design that helps guide airflow down the back of your rack, rather than passing between occupied spaces. Improved airflow helps ensure your rack-mounted equipment is running at an optimal temperature.

The RKPNLHS4U is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Applications

- Fill in unused gaps between equipment in server racks and cabinets
- Access your covered rack with an open-and-shut design
- Help guide the airflow along the back of your rack, instead of passing through your equipment

Features

- Create a tidy and professional look by covering unused rack space
- Easily access rack components by opening the hinged panel
- Versatile installation options with a reversible blank panel that can open from the left or the right side
- 4U solid rack-panel design
- Mounts to standard 19" 2 or 4 post racks
- Sturdy steel construction
- Rack screws and nuts included
